

Temperature Forecasts

Figure 1: Mean surface temperature for Tuesday 12 July 2016 to Wednesday 20 July 2016

Mean temperatures for most parts of South Africa are expected to be between 8 and 14°C for the period 12 July–20 July 2016.

(°C)

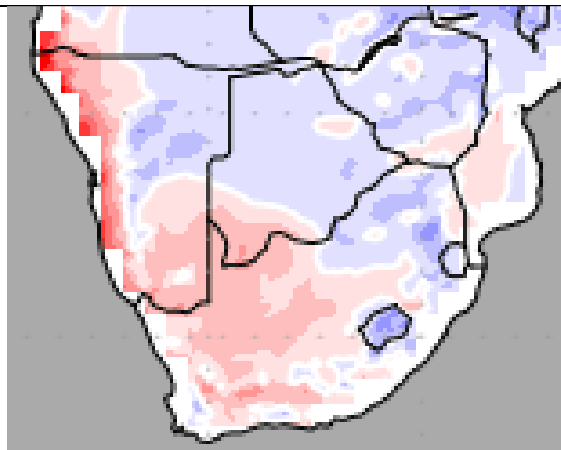

Figure 2: Temperature anomaly for Tuesday 13 July 2016 to Wednesday 20 July 2016

Temperature anomaly for the period 13 July – 20 July 2016.

Temperatures for most parts of the interior South Africa, especially the Northern Cape, will remain higher than normal.

Lower than normal temperatures are expected in North-West, Gauteng, Limpopo and Mpumalanga as indicated in blue.

Temperature forecasts from the **National Centers for Environmental Prediction**.

Normal Temperature derived from CRU monthly climatology for 1901 – 2000

Precipitation Forecasts

(mm)

Figure 3: Precipitation for Tuesday 13 July 2016 to Wednesday 20 July 2016

Rainfall expected for most areas in the Western Cape is between 5 and 20 mm.

(% of normal)

Figure 4: Precipitation (% of normal) for Tuesday 13 July 2016 to Wednesday 20 July 2016

Precipitation (% of normal) for the period 5 July–13 July 2016.

The major part of South Africa remains dry with little to no rain expected.

Normal rainfall is expected in parts of the Western Cape.

Precipitation forecasts from the **National Centers for Environmental Prediction**.

Normal rainfall derived from CMAP monthly climatology for 1979 – 2003
