Weekly Weather Forecast

## Weekly Outlook - 6 December 2016

### Temperature

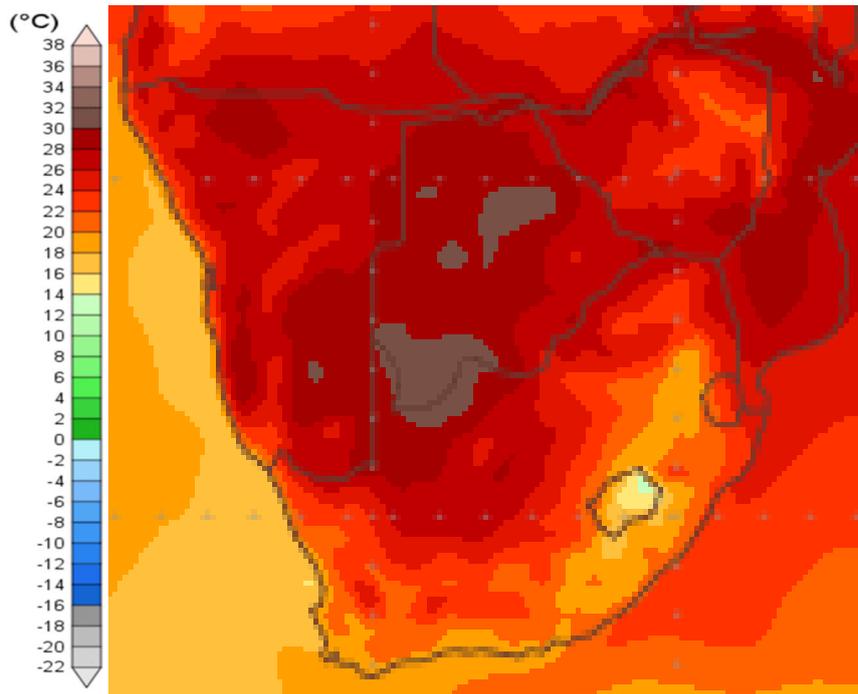

Figure 1: Mean surface temperature from Tuesday 6 December to Wednesday 14 December 2016

Extremely hot conditions are expected over most parts of the country with highest temperatures expected over the Northern Cape, North West and the northern regions of Limpopo. Temperatures along the lower coastal regions, up to KZN, are expected to remain between 16 and 22°C.

**Note:**

Temperatures reflect daily average temperatures over an 8 day period.

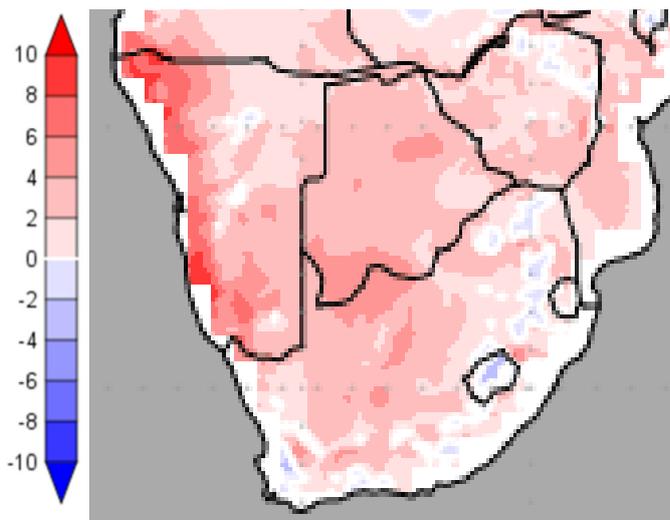

Figure 2: Temperature anomaly for Tuesday 6 December to Wednesday 14 December 2016

Warmer than normal temperatures are expected for most of South Africa except for isolated areas, shown in blue. The coastal regions can expect normal temperatures for this time of year.

Temperature forecasts from the **National Centers for Environmental Prediction**. Normal Temperature derived from CRU monthly climatology for 1901 – 2000

# Rainfall

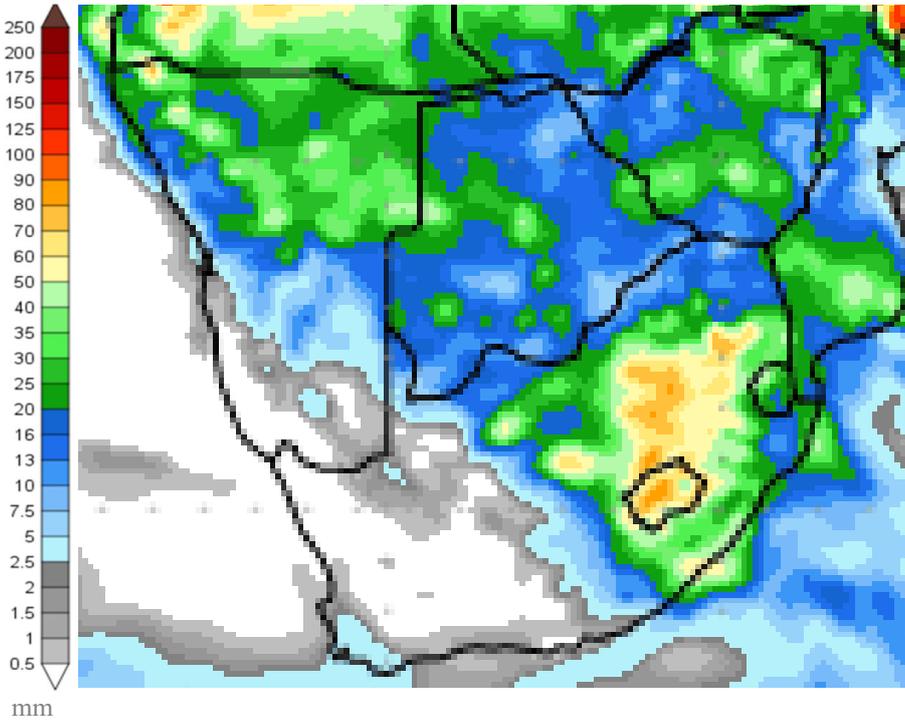

Figure 3: Precipitation for Tuesday 6 December to Wednesday 14 December 2016

The rainfall outlook for this week shows the possibility of showers over the summer rainfall region. Between 20 to 50 mm is expected for most parts of North West, Gauteng, KZN and Mpumalanga. Northern Limpopo will receive between 10 to 20mm. There is a possibility of up to 5mm in parts of the Western Cape.

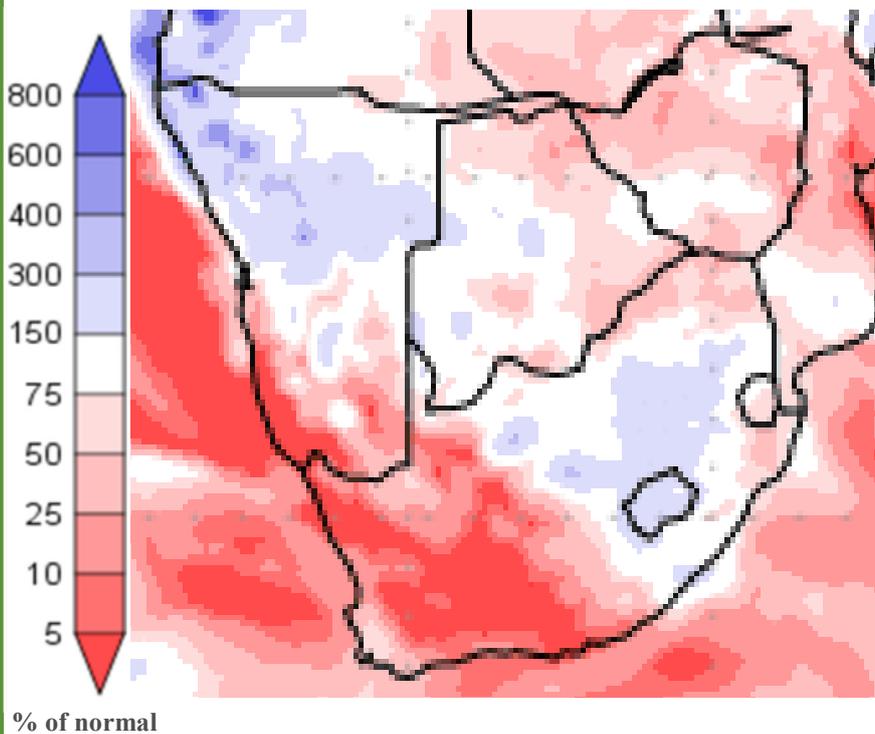

Figure 4: Precipitation (% of normal) for Tuesday 6 December to Wednesday 14 December 2016

An area stretching from the Northern Cape, through the Free State, North West, Gauteng to Mpumalanga, northern Eastern Cape and KZN will receive normal to above normal rainfall this coming week. Above normal rainfall will mainly occur around the northern and central Free State, eastern North West, Gauteng and Mpumalanga. Northern Limpopo will receive below normal rainfall. The rest of the country will remain dry with below normal rainfall over the Western Cape.

## Precipitation forecasts from the **National Centers for Environmental Prediction.**

Normal rainfall derived from CMAP monthly climatology for 1979 – 2003
